

The Unknown Knows

In this dream where I ever been
Try to figure out what's my future
In the sky someone flying high
Try to understand what's the matter
In the street I feel incomplete
Try to change something for much better

Things come and go
And life is growth
Whether I know
The unknown knows

Talk to me
About UFO
I believe he will
Come to see you

Talk to us
How much time we have
Too late for ozone
What we should do

Talk to them
Just a waste of time
Bind by natural
Same thing for youth

Come, come and go
Whether we're blown
Whether I hope
The unknown knows

Much too high
I feel free
I had no
Sympathy

Getting down to reality

Look outside
Answers awaiting
Never been taking
Absolution

Look inside
What is left aside
Death is mystical
No more questions

Look around
One day I'll be gone
Nothing about love
Just delusion

I come and go
And city grows
How much I drove
The unknown knows

What comes up over me
Stop
Wait
I wish I know the one who knows

I will wait for you
Nothing you can do
All I hear at night
The voice of your mind
I will die for you
Nothing I can do
Just to past the time
And they are aside
I knew it was you

Sub Effect

The one inside is alive
And be a part of my life
The one inside makes a sign
And keep a look to the light

I feel the panic on board
It seems to be a black fog
I heard a sound of rumour
It says I'm far from the shore

Why I only catch the no sensation
Swimming under my periscopic perception
Where the abnormal lives
With a strange contorsion

I navigate
In my maze
Investigate
To be safe, safe, safe, safe

Across the ocean
I'm tryin' to survive
Where eco system
Got lost for a while

The last with obscenity
At young for eternity
The first to sink in the sea
Have been the wreck of the deep

Why I only catch the no sensation
Swimming under my periscopic perception
Where the abnormal lives
With a strange contortion

I navigate
In my maze
Investigate
To be safe, safe, safe, safe

Across the ocean
I'm tryin' to survive
Where eco system
Got lost for a while

I just want to relax on my coral reef
Smelling a strange odour
Of Cyclops' meat
I think "What kind of Morse code you're
talking ?
Tell me how long will that trip go on ?"
Please
No, no

Too late for S.O.S.

I've got a fisheye view
I'm on the floating line
No Perseids for Johnny
I'm goin' to live otherwise
The error is perfect
As the sub effect in my mind
My mind, my mind

The one inside is alive
And be a part of my life
The one inside makes a sign
And keep a look to the light
To the light

Nothingface

Denied, denied
Hard, time, say
To erase
His smile
Of your face

Idolize
Be unique
Double mind
Just to please

One person
Many sides
Some reasons
Change your style
Most flexions
Show a lie

Idolize
Be unique
Double mind
Just to please

Like the snake
Lost its skin
You're been fake
Copy him
Nothing face
You're no me

Act for those
Who act the most
Who is the you
Play a game
To feel the same
Are you the who
Give a sense
And be yourself

Lie is a life
Lie is alive
Idolize
Be unique
Double mind
Just to please

Pre Ignition

Hey you!
I'm asking what's his name
He said he couldn't say
Working on section three
In disinfectant is you
The real perfect product
Sophisticate a sort
The millions on the dunes
Came out for those big tubes

Are you
The new atomic times
Which call the wildly ones

Hey you!
Walking on toxic mess
The planet will unrest
Excavation to rise
Aluminum disease you
You know what you are made
Device predestinate
Their fathers couldn't stand
Just how brutal this land

Are you
The new tide of the creek
The bad luck put me here

Currently
Some electronic flames
Honestly
Looks like they film

Keep walking on deadly sands

Turn it on
The hydraulic wheels
Pouring out
The ultimate need
Now
I hide myself
And watch over the pipes
They stop themselves
And looking at my side

Then they go back to work
Just like nothing disturbed
Cybernetic beings
Are more wise than you think

Living in such hell
Derange the tune
The love in their head
Shock by a burst

Suddenly
Most get out of the place
Obviously
The rest must leave

Keep going on deadly sands

Running out
From empire complex
Passing on
The forbidden access
Now
They can be free
They're from what they are made
Synthetic lives
Their pre-ignition phase

Pre-ignition
Hid inside you
Pre-ignition
Drives myself too

Into My Hypercube

From the backyard
I've heard a sound
Time have been hard
For my playground

On my own in my dome
Locking my thought
Behind the door
Figure moves inside walls
Absorbin' the lot of ghosts

All my sins are stuck in a cave
Where the ladder is broken
Memories sleep in dust
The shelter is my head

Windows are my eyes
Stay awake 'till the time
You're not at my mouth

Fictional illusion
Clairvoyance detection
Transformed condition
Physical connection

Rise, high
Rise, higher
Phenomena, phenomena
Hypercube and no way out
Phenomena, phenomena

Windows are my eyes
Stay awake 'till the time
You're not at my mouth

Fictional illusion
Clairvoyance detection
Transformed condition
Physical connection

Rise, high
Rise, higher

Phenomena, phenomena
Hypercube and no way out
Phenomena, phenomena

My nighttime is for
Telepathic talks
Some fantastic scenes
Open up my dreams

Fulfilling the forms
Breaking out the norms
Creating a storm
Where you all live under (bis)

I'm still feeling there's something bad here
I don't want exchanging a thing
I don't face what's going on outside
Around

Down the hallway
Go for thinking
To the stairways
Where I'm fallin'

Can you feel
How it's real
It's too late
I'm getting pale
A liquid
Now I bleed
I feel weak
It's my breath
My monsters laugh at my face
While my reign is dying
Defying this, your void place
I have them free
To see them yell

X-Ray Mirror

Tunnel was so long
Where is the bottom
A strange reflection
Pass through my vision
I didn't notice
Beside the last door
Standing on nothing
There was a mirror

Looking at me
Even inside
I do, he does
Face what I hate
Hate

Is this myself
Am I behind
Who's the right one
In the right place
Place

I can't believe this is my image
Like the mirror and got no frame

Showing my inside
At the daylight
Trusting this bad side
It can't say a lie
My soul is haunted
By view of horror
Beyond expected
Is it a mirror

Look back at me
Around my mind
I do, he does
Rip off its face
Face

Curiosity
Caught up with me
My privacy
Seems to fade

Fade
Fade away

I can't believe this is my image
Like the mirror intransigent change
Rolling over my downfall age
It use to be me
He knows who is free

Ohhh!

How long I will wait
Yeah
I'm in the wrong place
Yeah, hey

I can't believe I am the image
Back the mirror where nothing face
The glass is broken but I look the same

Inner Combustion

Essence
That no one knows about
Substance
Just waiting to burn down
Christians
Taught at what evil was
Suspense around the melting corpse

A pretty strange way
You got no appetite
To finish my days
The death is mercified

People say 'how come'
So unbelievable
This guy was so young
Thing sort of tragical

Inner combustion
And without reason
I feel overdrive
Flames through my side

Crispy sound
Just like bombs
Smoke around
Such a good way to die

Infernal system
The fire is started up
Don't need requiem
That's for the son of god

It's getting warmer
The thermic brings up
Such like vampire
Burn down from wood rod

Inner combustion
And without reason
I feel overdrive
Flames through my side

Crispy sound
Just like bombs
Smoke around
What a show when you die

Inner combustion
And without reason
I feel overdrive
Flames
Through
My
Side

Silence
My rest will rest in peace
Decence
Was not the way I live
Brilliance
No need for autopsy
Patience
Life still burnin' in me

Missing Sequences

Creep inside
Lock downstairs
Freeze as ice
Shock my head

Ha!

It belongs to me
Out of body feel
How I do rely
About to remind
Remind

When, where
Like a foetus, time lost
Who, how
Like a virus, black dots

Transcending messages
Without form, where it's from
Draw my moves

Erasing my ribcage
From the map
'Till I crack
As I lose

My answers
Ask question
No further
For action

Just like I never know
Some says I should go, go

I'm aware of me
There's nothing I need
Missing state of mind
Can't help to revive, revive

When, where
Like a foetus, time lost
Who, how
Like a virus, black dots

My brain feels
The saccage
The trigger, the sensor
Switch like dreams

My soul lives
The ravage
Without means, without scene
Seems unreal

Memory
Had to leave
No entry
But I live

I don't know, how
I don't know, now
I should go, out

I don't know, how
I don't know, now
I should go, out
